Scribe: Electronic Presentation

The Scribe is responsible for an Electronic Presentation. The Electronic Presentation may take any format you would like. I listed some possible ideas below, but if you have another idea let me know. I have included some Power Point templates in your links on the Web Quest Process page. You may work directly in these templates and save them as your own, or use them as a guide as you create your Presentation with some other software.

- You may use Power Point, SMART Notebook, Prezi, etc. If you choose software not listed, please speak with the teacher to get approval.
- Include all of the information from the Airplanes Log to create your presentation
- The information should be organized in a logical manner
- Should include a reflection comparing your data with your hypothesis and a statement about which Airplanes you recommend to the Committee
- Include visuals: colors, pictures, photos, drawings, charts, tables, etc.
